

EQUI-TREK®

EVERY ADVENTURE BEGINS WITH *THE JOURNEY*

HORSEBOX RANGE

Made in UK

THE ULTIMATE IN HORSE TRANSPORTATION BY AN EXPERIENCED TEAM OF EQUESTRIANS

Equi-Trek is the largest producer of horseboxes and trailers in the UK and the only British company to manufacture a complete range of horse transport from lightweight, towable trailers up to large motorised horseboxes.

Equi-Trek is a family run company who have an in depth understanding of the requirements of both horse and rider, having successfully competed in equestrian sport at International level for many years. Together with their team of qualified engineers and designers, they ensure that the utmost priority is given to the well-being, safety and comfort of the travelling horse. Equi-trek horseboxes also have full European type approval and are built in ISO9001 accredited factories.

When you purchase a new Equi-Trek horsebox you receive a year's free breakdown cover with Equine Rescue Services who provide specialist horsebox breakdown cover of the highest standard. Their core responsibility is to ensure the welfare of you and your horses in a breakdown emergency, 24 hours a day.

THE EQUI-TREK STORY

Developments in horse transport over the last two decades have significantly improved functionality and safety for both horses and their handlers. Equi-Trek, one of the longest-standing equine transport manufacturers, is responsible for many of these breakthroughs.

The story behind the brand

Equi-Trek CEO, Tom Janion, grew up in Meltham, near Huddersfield and started horse riding at 18 months old. Parents, Hilary and Ray, founded the popular horse clothing brand, Masta, and in the mid-1990s sold the business to national shoe retailers Stylo Plc. The Janion family then began producing a large number of competition horses, and Tom excelled at showjumping, competing for the British Team and winning at the Horse of the Year show.

On leaving school at 16 Tom and his father came up with the idea of creating side-loading horse trailers and proudly patented the first side-loading ramp on a rear-facing horse trailer, to improve handler safety and to reduce stress for horses in transit. This idea came from their own experience and knowledge of travelling horses.

Ray explains: "Loading young or nervous horses on my own when using a rear-loading trailer could easily turn disastrous, with the horse moving backwards out of the trailer when halfway in.

"With the side-loading trailer, I could stay on the left of the horse and exit immediately down the ramp, which was then closed safely with the horse side-on. We also found that horses loaded much better into a light, wide and inviting space and settled much better when travelling rear-facing."

Several scientific papers have since been published confirming that rear-facing travel is preferential for two thirds of horses.

The first Equi-Trek factory was set up in Meltham and before long Equi-Trek was also producing motorised horseboxes and had expanded to seven smaller factories around the area. It was decided that they should consolidate and in 2017 they moved the factories to the former Fox Wire site at Stocksbridge. This site is a 200,000 Sq ft factory on a 75 acre site north of Sheffield, and remains as the company's head office and manufacturing site today.

Equi-Trek horseboxes and trailers are only ever built on brand-new chassis, backed by a three-year warranty and all new models are wood free.

TREK-GROUP

Equi-Trek is part of Trek-Group, a group of automotive engineering companies specialising in building vehicles for Ambulance & Healthcare, Police & Home Office, Fire & Rescue, Defence, Highways & Amber and Rescue organisations. The group builds vehicles for single, small or large volume requirements for the UK and International Export markets from its three UK Technical & Engineering Centres.

HIRE

Equi-Trek horseboxes and trailers are available for self-drive hire, on a short-term or long-term basis. Whether your own transport is temporarily out of action or you're planning a trip but don't have your own transport, Equi-Trek has you covered with a friendly, efficient service. Many customers also like to try before they buy. Please contact your local dealer to find out which models are available in your area or email hire@hire-trek.com.

WARRANTY & SERVICING

Equi-Trek offers a three-year warranty on all new models and is committed to providing exceptional servicing and warranty across its international network of dealers and approved partners.

When you purchase an Equi-Trek from an official dealership you can be certain that your horsebox or trailer meets the highest quality and safety standards. This is supported by Equi-Trek's warranty service policy using only genuine parts and accessories.

SAFETY & TECHNICAL FEATURES

A Adjustable Partitions with PVC Skirts

Strong, fully adjustable partitions can be easily altered to accommodate different sized horses and can be perfectly positioned for your horses' comfort. PVC Skirts allow the horse to spread its legs to stabilise whilst still using the partition for support.

B Composite High Impact Kick Boards

The composite high impact kick boards provide superior strength and impact resistance.

C Full Width Collapsible Breast Bar

For ultimate safety and peace of mind the breast bar is designed to collapse in case of emergency and can easily be collapsed from the exterior of the horsebox, alleviating risk to the handler.

D Low Wide Ramp

A low and inviting full ramp allows the horse to get all four hooves onto the ramp before going inside the horsebox.

E Side-Loading Ramp

The Equi-Trek side loading ramps are on the right-hand side so that when the handler loads the horse they are on the left of the horse and remain on that side when the horse turns to face the rear, so the handler is never trapped between the horse and the wall. The light and spacious interior encourages reluctant loaders.

F Strong Aluminium Plank Floor

Aluminium plank flooring is used for strength and durability. Heavy duty shock absorbing rubber is laid over the aluminium to help prevent your horse from slipping during transit and also features adequate drainage.

G Market Leading Payload

Equi-Trek has the market leading payload on all models due to the use of carbon fibre technology, this saves at least 100kg in weight.

H Bulkhead

Fully reinforced and tested bulkhead ensuring the utmost safety for driver, passenger, and horses. Full height bulkhead to separate the horse and living area.

I Cab & Chassis

All our vehicles are built on brand new unregistered chassis'. The cab includes fully European type approved seatbelts.

J Wood Free Structure

All second generation Equi-Trek horseboxes are wood free for safety and longevity. Composite panels are strong and robust but lightweight.

K Safety Loading Doors

Safety loading doors help guide your horse up and into the horsebox preventing them from stepping off the side of the ramp. The safety doors can also be left closed when the ramp is down, to allow for increased ventilation when horses are on board.
