EVERY ADVENTURE BEGINS WITH *THE JOURNEY*

HORSE TRAILER RANGE

Made in UK

THE ULTIMATE IN HORSE TRANSPORTATION BY AN EXPERIENCED TEAM OF EQUESTRIANS

Equi-Trek is the largest producer of horseboxes and trailers in the UK and the only British company to manufacture a complete range of horse transport from lightweight, towable trailers up to large motorised horseboxes.

Equi-Trek is a family run company who have an in depth understanding of the requirements of both horse and rider, having successfully competed in equestrian sport at International level for many years. Together with their team of qualified engineers and designers, they ensure that the utmost priority is given to the well-being, safety and comfort of the travelling horse. Equi-trek horseboxes also have full European type approval and are built in ISO9001 accredited factories.

When you purchase a new Equi-Trek horsebox you receive a year's free breakdown cover with Equine Rescue Services; who provide specialist horsebox breakdown cover of the highest standard. Their core responsibility is to ensure the welfare of you and your horses in a breakdown emergency, 24 hours a day.

THE EQUI-TREK STORY

Developments in horse transport over the last two decades have significantly improved functionality and safety for both horses and their handlers. Equi-Trek, one of the longest-standing equine transport manufacturers, is responsible for many of these breakthroughs.

The story behind the brand

Equi-Trek CEO, Tom Janion, grew up in Meltham, near Huddersfield and started horse riding at 18 months old. Parents, Hilary and Ray, founded the popular horse clothing brand, Masta, and in the mid-1990s sold the business to national shoe retailers Stylo Plc. The Janion family then began producing a large number of competition horses, and Tom excelled at showjumping, competing for the British Team and winning at the Horse of the Year show.

On leaving school at 16, Tom and his father came up with the idea of creating side-loading horse trailers and proudly patented the first side-loading ramp on a rear-facing horse trailer, to improve handler safety and to reduce stress for horses in transit. This idea came from their own experience and knowledge of travelling horses.

Ray explains: "Loading young or nervous horses on my own when using a rear-loading trailer could easily turn disastrous, with the horse moving backwards out of the trailer when halfway in.

"With the side-loading trailer, I could stay on the left of the horse and exit immediately down the ramp, which was then closed safely with the horse side-on. We also found that horses loaded much better into a light, wide and inviting space and settled much better when travelling rear-facing."

Several scientific papers have since been published confirming that rear-facing travel is preferential for two thirds of horses.

The first Equi-Trek factory was set up in Meltham and before long Equi-Trek was also producing motorised horseboxes and had expanded to seven smaller factories around the area. It was decided that they should consolidate and in 2017 they moved the factories to the former Fox Wire site at Stocksbridge. This site is a 200,000 Sq ft factory on a 75 acre site north of Sheffield, and remains as the company's head office and manufacturing site today.

Equi-Trek horseboxes and trailers are only ever built on brand-new chassis, backed by a three-year warranty and all new models are wood free.

TREK-GROUP

Equi-Trek is part of Trek-Group, a group of automotive engineering companies specialising in building vehicles for Ambulance & Healthcare, Police & Home Office, Fire & Rescue, Defence, Highways & Amber and Rescue organisations. The group builds vehicles for single, small or large volume requirements for the UK and International Export markets from its three UK Technical & Engineering Centres.

HIRE

Equi-Trek horseboxes and trailers are available for self-drive hire, on a short-term or long-term basis. Whether your own transport is temporarily out of action or you're planning a trip but don't have your own transport, Equi-Trek has you covered with a friendly, efficient service. Many customers also like to try before they buy. Please contact your local dealer to find out which models are available in your area or email hire@hire-trek.com.

WARRANTY & SERVICING

Equi-Trek offers a three-year warranty on all new models and is committed to providing exceptional servicing and warranty across its international network of dealers and approved partners.

When you purchase an Equi-Trek from an official dealership you can be certain that your horsebox or trailer meets the highest quality and safety standards. This is supported by Equi-Trek's warranty service policy using only genuine parts and accessories.

LIGHTWEIGHT AND SPACIOUS

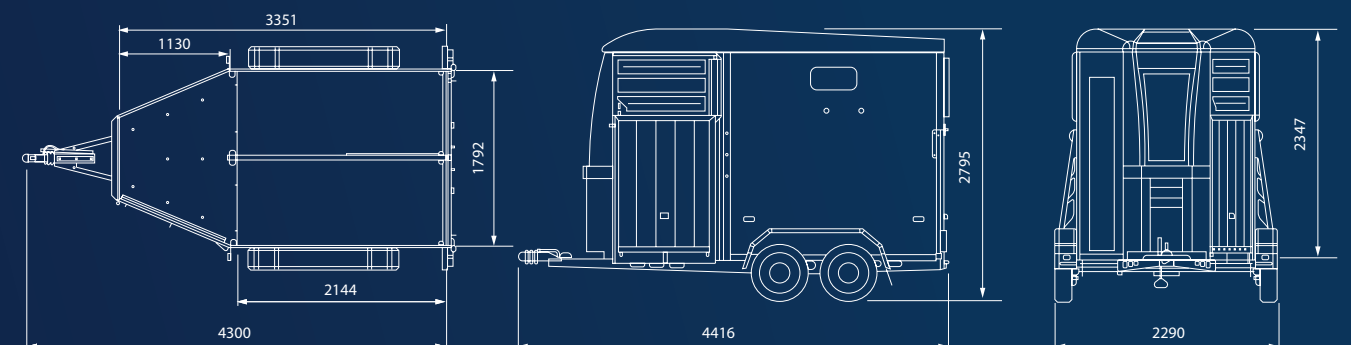

INTRODUCING APOLLO

-  Two Horses
-  Weight 2000Kg & 2600Kg
-  3 Year Warranty
-  Wood Free
-  Rear Loading
-  Front Facing

Unrivalled for its strength and performance, the Apollo has a spacious and light horse area with exceptional headroom to accommodate horses up to 18hh. Horses travel forward facing and are unloaded with ease using the extra wide front ramp. Manufactured using cutting-edge engineering techniques and superior materials creating a wood free, lightweight trailer to safely transport your horse. The back portion of the partition can be moved for loading, giving the horse a wide and inviting space to move into, and removable breast bars can be collapsed from the outside of the trailer, in case of an emergency.

WEIGHTS & DIMENSIONS

Length 4416mm	Front Axle Load:	1350Kg	1350Kg
Width 2290mm	Rear Axle Load:	1350Kg	1350Kg
Height 2795mm	Unladen Weight:	845Kg	855Kg
	Gross Weight:	2000Kg	2600Kg

PERFECT DAY TRAILER

INTRODUCING DAY-TREKA

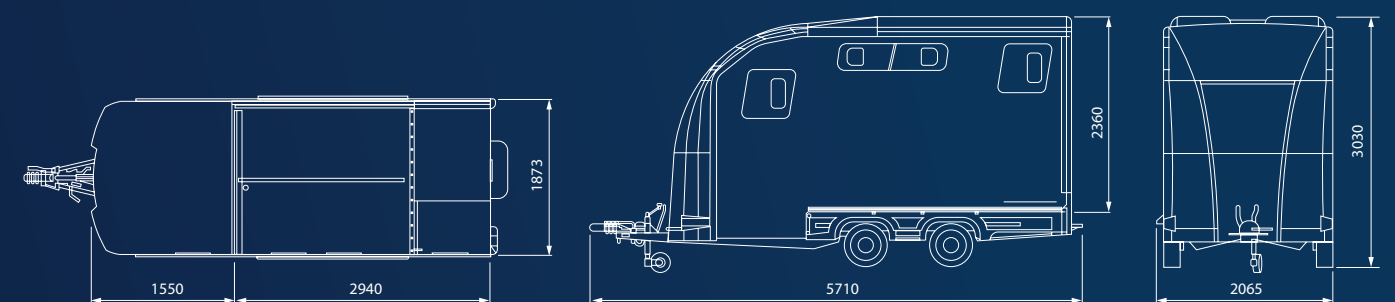

-  Two Horses
-  2000Kg
2500Kg
3000Kg
-  3 Year Warranty
-  Wood Free
-  Changing & Tack Area
-  Side Loading
-  Rear Facing

The perfect day trailer, the Day-Treka provides spacious rear facing travel for horses, and a large changing and tack area for owners. This trailer is wood free with a lightweight structure made from composite panels, which allows for a generous payload on either the 2000kg, 2500kg or 3000kg gross weight model. The fully enclosed horse area boasts a fantastic 7feet 9inches of head room and a low wide side ramp for safe and easy loading. The large tack and changing area is totally separate from the horse area and features an interior light, two saddle racks, two bridle racks and two coat hooks, providing a practical space to store all the essentials required when you travel with your horse.

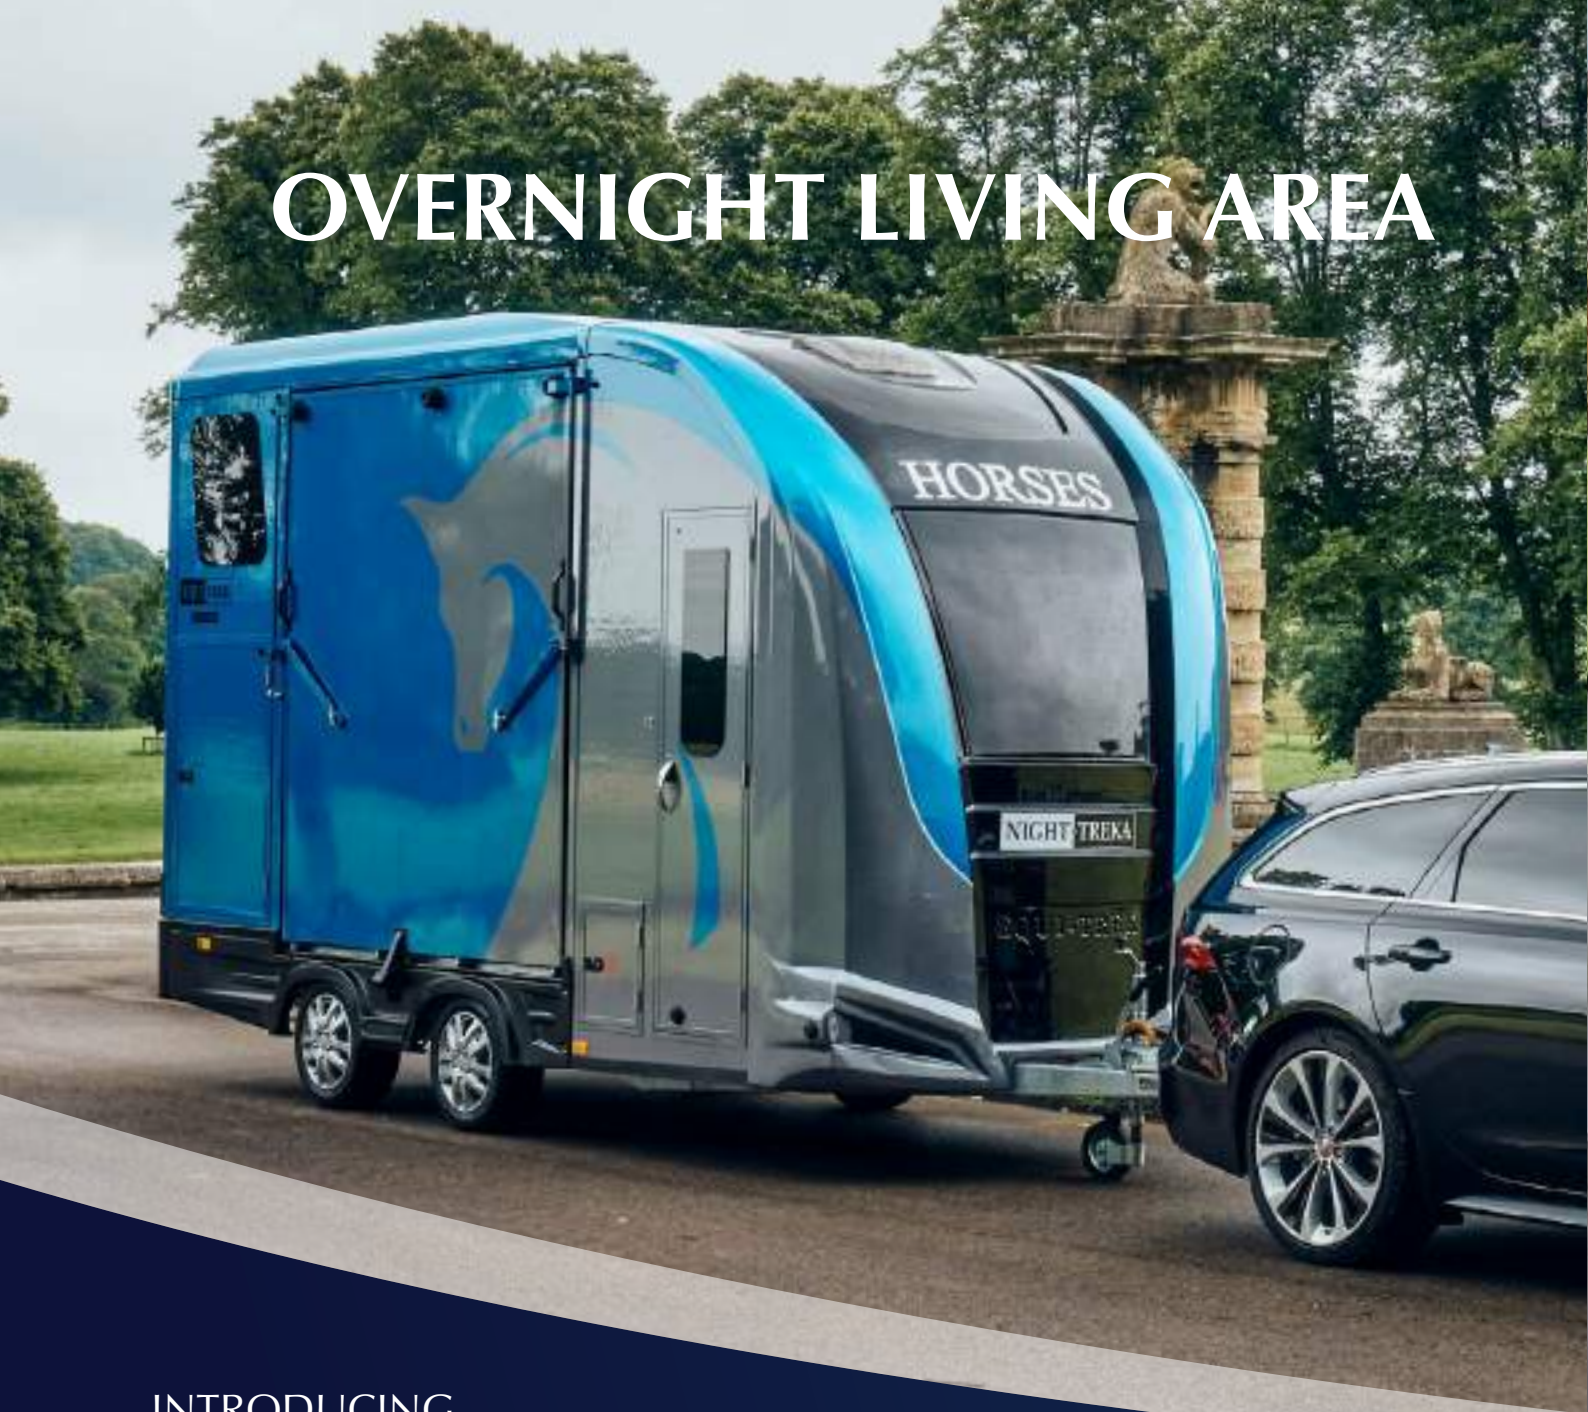

WEIGHTS & DIMENSIONS

Sleeps Two

Side Loading

Rear Facing

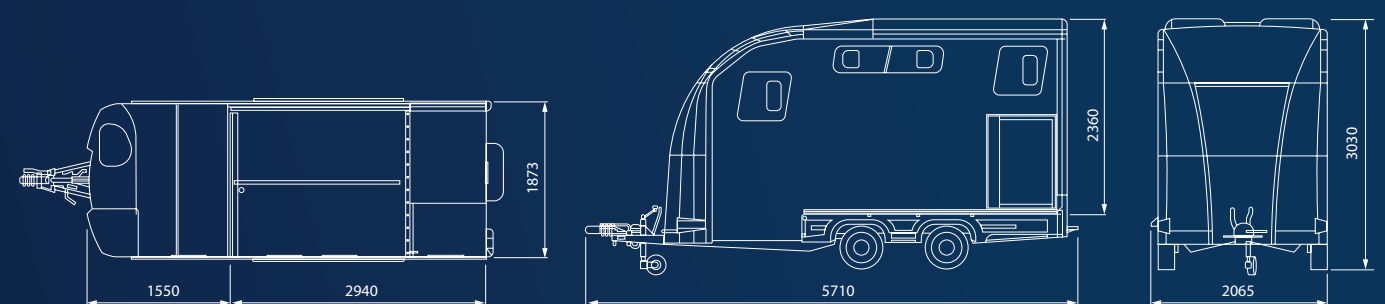

For those looking for a trailer with overnight accommodation, the Night-Treka ticks all the boxes. The living area can comfortably sleep two people, making the Night-Treka a serious contender for horse owners who want to stay away from home. The living area features seating that converts into two sleeping bunks, a stainless-steel sink with a gas hob and water carrier, along with a fold down table providing somewhere to eat meals. Storage is no problem either, as the trailer comes complete with a practical tack locker that is fitted with two saddle and two bridle racks.

Four Ponies

3500Kg

2 Year
Warranty

Changing &
Tack Area

Rear
Loading

Herringbone
Travel

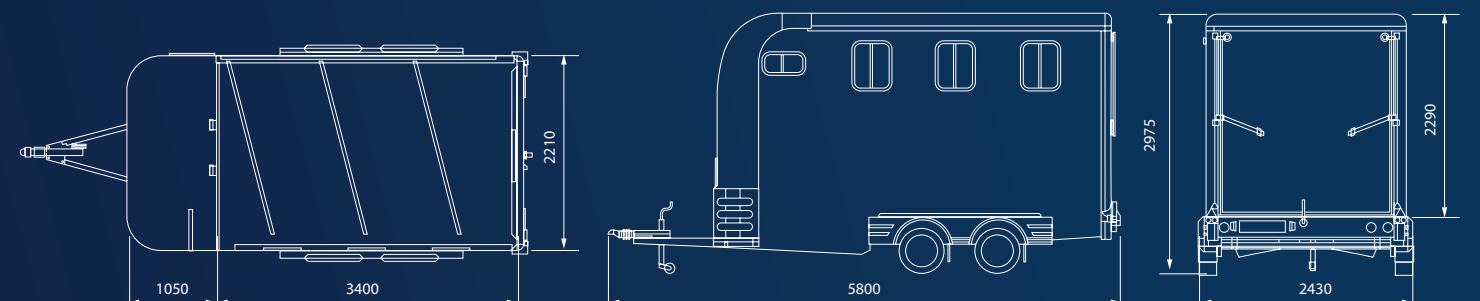

The Space-Treka III carries up to three horses or four ponies (depending on size and weight) whilst remaining compact and easy to tow. The totally separate tack and changing area provides ample space for all your equipment and a place to escape the weather, making show days so much more enjoyable. The horses travel herringbone as in larger horseboxes, and load with ease up the low, wide, rear ramp. The standard safety loading doors guide the horses up the ramp for additional safety.

WEIGHTS & DIMENSIONS

Length 5800mm
Width 2430mm
Height 2975mm

Unladen Weight: 1500Kg*
Axle 1 Load: 1800Kg
Axle 2 Load: 1800Kg
Gross Weight: 3500Kg

*Unladen weight; dependant on final specification.

LIVING AREA & MULTI-HORSE TRAVEL

INTRODUCING **ALL NEW** MULTI-TREKA

- Three Horses or Ponies
- 3500Kg
- 3 Year Warranty
- Living Area
- Wood Free
- Sleeps Two
- Optional Bathroom
- Rear Loading
- Herringbone Travel

The triaxle Multi-Treka can carry up to three ponies or horses (depending on size and weight) and they load up the low and inviting rear ramp into the fully enclosed horse area. The wide body allows horses to turn easily when loading and unloading, and the herringbone travel is preferred by some horses making the trailer the ideal option for many owners. The full luxurious living area provides overnight accommodation for two people. The dinette seating converts to a comfortable double bed and the well-equipped kitchen area allows for catering when away from home. The living area is complete with a toilet area and excellent storage.

WEIGHTS & DIMENSIONS

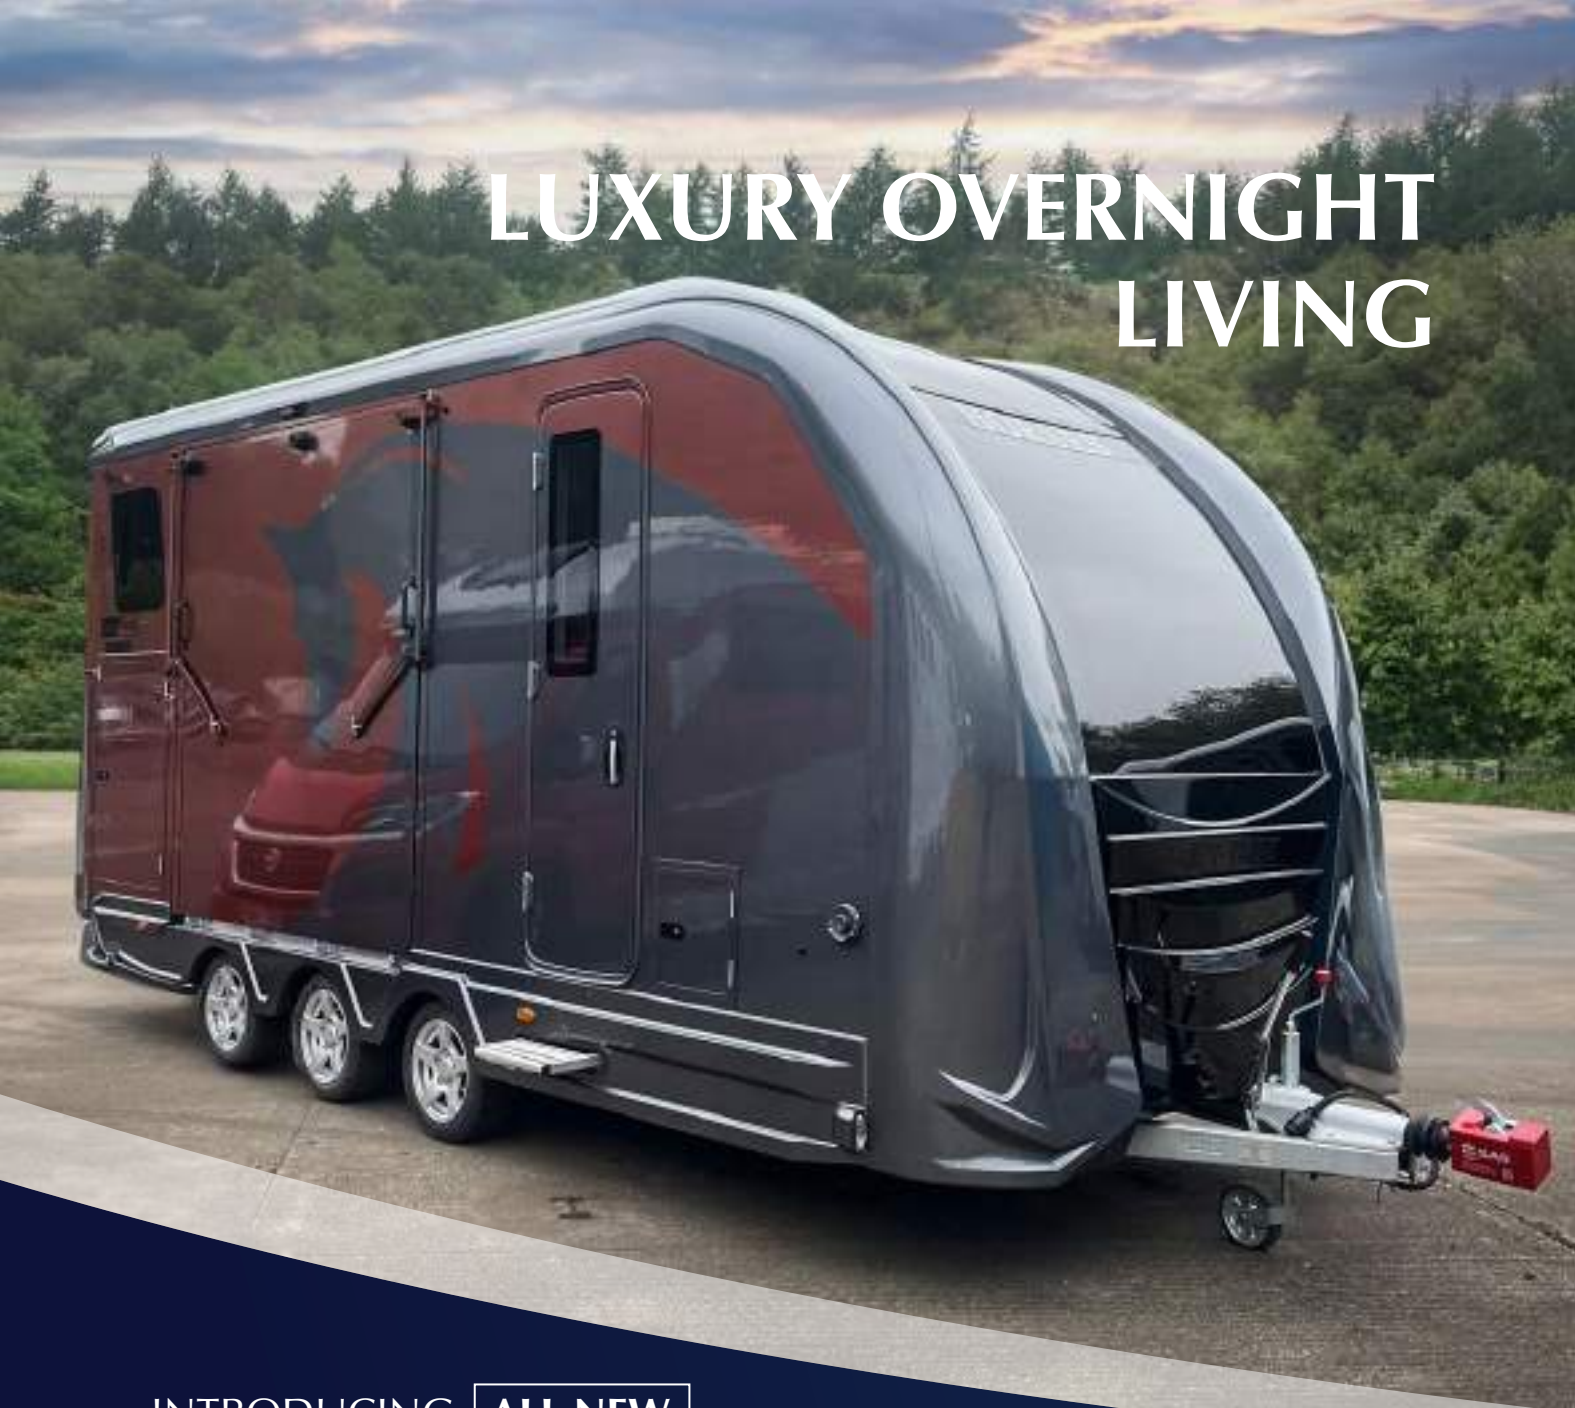

Length 6730mm
Width 2244mm
Height 3150mm

Unladen Weight: 1985Kg*
Axle 1 Load: 1500Kg
Axle 2 Load: 1500Kg
Axle 3 Load: 1500Kg
Gross Weight: 3500Kg

*Unladen weight; dependant on final specification.

LUXURY OVERNIGHT LIVING

INTRODUCING **ALL NEW** STAR-TREKA

- Two Horses
- 3500Kg
- 3 Year Warranty
- Living Area
- Wood Free
- Sleeps Two
- Optional Bathroom
- Side Loading
- Rear Facing

The Star-Treka is a rear facing, spacious two horse trailer with luxury overnight accommodation. This stunning trailer features the latest in aerodynamic body styling which is unique to the Equi-Trek range, and the triaxle chassis allows for both a spacious horse area and living area. The living area is bright and welcoming with a large panoramic window and provides overnight accommodation for two people. The dinette seating converts to a comfortable double bed and the well-equipped kitchen area allows for catering when away from home. The living area is complete with a toilet area and excellent storage. The horse area is equipped to the highest standard and is suitable for two large horses.

WEIGHTS & DIMENSIONS

Length 6870mm	Unladen Weight:	1900Kg*

Height 3150mm	Axle 2 Load:	1500Kg
	Axle 3 Load:	1500Kg
	Gross Weight:	3500Kg

*Unladen weight; dependant on final specification.

SAFETY & TECHNICAL FEATURES

A Wood Free Structure

All second generation Equi-Trek trailers are wood free for safety and longevity. Composite panels are strong and robust but lightweight for market leading payloads.

B Full Width Collapsible Breast Bar

For ultimate safety and peace of mind the breast bar is designed to collapse in case of emergency and can easily be dropped from the exterior of the trailer, keeping the handler safe.

C Strong Aluminium Plank Floor

Aluminium plank flooring is used for strength and longevity. Heavy duty shock absorbing rubber is laid over the aluminium to help prevent your horse from slipping during transit and flooring also features adequate drainage.

D Low Wide Ramp

A low and inviting full ramp allows the horse to get all four hooves onto the ramp before going inside the trailer. The ramp is covered in slip-resistant rubber.

E Side-Loading Ramp

Side loading ramps provide a light and spacious interior that encourages reluctant loaders. The side ramps are situated on the right-hand side so that when the handler loads the horse they are on the left. The ramp can be shut safely with the horse side on, and in case of a breakdown or accident the horse can be unloaded without the worry of the ramp not being able to be dropped if there is a barrier, hedge or ditch on the left.

F Safety Loading Doors

Safety loading doors help guide your horse up and into the trailer preventing them from stepping off the side of the ramp. The safety doors also keep horses safe when stationary with the ramp down, increasing ventilation and allowing them to see out.

G Adjustable Partitions with PVC Skirts

Strong, fully adjustable partitions can be easily altered to accommodate different sized horses and can be perfectly positioned for your horses' comfort. PVC Skirts allow the horse to spread its legs to stabilise whilst still using the partition for support.

H Composite High Impact Kick Boards

The composite high impact kick boards provide superior strength and impact resistance.

I Market Leading Payload

Equi-Trek has the market leading payload on all models due to the use of carbon fibre technology, this saves at least 100kg in weight.

J Fully Braked Wheels

Fully braked wheels with low profile tyres and wheel trims or alloys.

K Independently Suspended Axles

Independently suspended axles for comfortable, quiet, and safe towing.

L Aerodynamic Fibreglass Mould

Modern aerodynamic fibreglass mould for lightweight and easy towing.

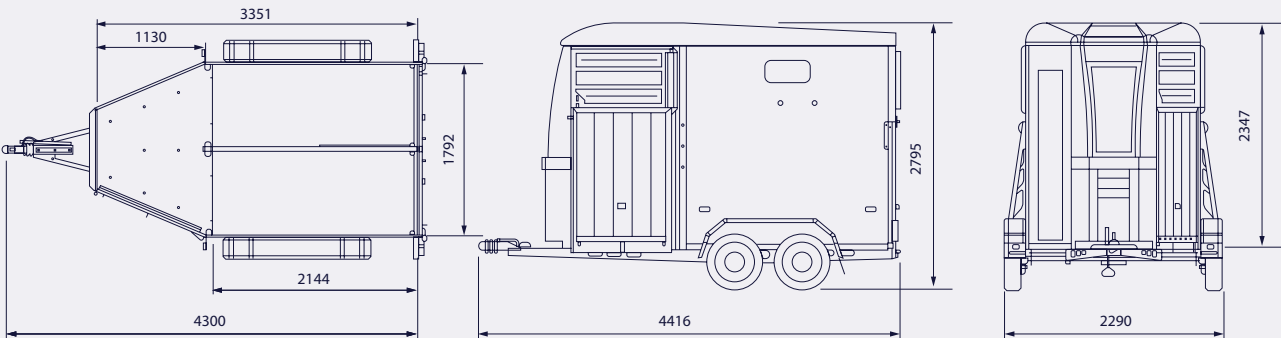

M Galvanised Steel Chassis

Durable galvanised steel chassis for a long, low maintenance life.
